- no septic plan on file
- plan dated _____ by _____
- inspection report dated _____ by _____

Estimated capacity of system = _____ gpd
 with grinder without grinder

Minimum capacity needed = _____ gpd

Notes:

∅ **PROPOSAL VIOLATES TITLE 5 OR LOCAL SEPTIC REGULATION –**

- ∅ Inadequate Set-back – Proposed construction is too close to one or more system components, which will violate CBHR 3.06 and 310 CMR 15.211(1) or 310 CMR 15.301(5).
- ∅ Insufficient Leaching Capacity – Proposed construction will exceed the approved carrying capacity of the septic system, which will violate 310 CMR 15.352.
- ∅ Excessive Nitrogen Load – Proposed construction is in a Zone 2 and will increase nitrogen loading to more than 4 bedrooms per acre, which will violate 310 CMR 15.214(1).
- ∅ Additional Documents Needed – The applicant failed to show that proposed renovations will not have an impact on the existing septic system. The following documents must be submitted for review and approval:
 - ∅ Floor Plan – Sketch that accurately depicts all rooms on all floors of all buildings, both before and after proposed renovation. May be drawn by the applicant.
 - ∅ Footprint Plan – Sketch that accurately depicts the footprint of the existing building, the proposed addition, and the measured dimensions of each. May be drawn by the applicant.
 - ∅ Certified As-built Plan – Sketch that depicts the footprint of the existing building, the location of various septic components, and the measured distance from each component to two corners of the building. Must be drawn and certified by a contractor.
 - ∅ System Inspection Report – Multiple-page report that details the condition of the system and shows the length, width, and depth of the leaching facility. Must be done by a DEP-approved system inspector.
 - ∅ Deed Restriction – Document which applicant files with the Registry of Deed that limits the property to ____ bedrooms.
- ∅ Other - _____
